- c. The Authority reserves the right to issue a new RFP for the project.
- d. The Authority reserves the right to postpone proposal openings for its own convenience.
- e. Each proposal will be received with the understanding that acceptance by the Authority of the proposal to provide the services described herein shall constitute a contract between the Offeror and Authority which shall bind the Offeror on its part to furnish and deliver at the prices given and in accordance with conditions of said accepted proposal and specifications.
- f. The Authority reserves the right to investigate the qualifications of any Offeror, and/or require additional evidence of qualifications to perform the work.

G. PRE-CONTRACTUAL EXPENSES

The Authority shall not, in any event, be liable for any pre-contractual expenses incurred by Offeror in the preparation of its proposal. Offeror shall not include any such expenses as part of its proposal.

3. Negotiating with the Authority any matter related to this proposal; or
4. Any other expenses incurred by Offeror prior to date of award, if any, of the Agreement.

H. JOINT OFFERS

Where two or more firms desire to submit a single proposal in response to this RFP, they should do so on a prime-subcontractor basis rather than as a joint venture. The Authority intends to contract with a single firm and not with multiple firms doing business as a joint venture.

I. TAXES

Offerors' proposals are subject to State and Local sales taxes. However, the Authority is exempt from the payment of Federal Excise and Transportation Taxes. Offeror is responsible for payment of all taxes for any goods, services, processes and operations incidental to or involved in the contract.

J. PROTEST PROCEDURES

The Authority has on file a set of written protest procedures applicable to this solicitation that may be obtained by contacting the Contract Administrator responsible for this procurement. Any protests filed by an Offeror in connection with this RFP must be submitted in accordance with the Authority's written procedures.

K. CONTRACT TYPE

It is anticipated that the Agreement resulting from this solicitation, if awarded, will be a firm-fixed price contract specifying firm-fixed prices for individual tasks specified in the Scope of Work, included in this RFP as Exhibit A.

L. CONFLICT OF INTEREST

All Offerors responding to this RFP must avoid organizational conflicts of interest which would restrict full and open competition in this procurement. An organizational conflict of interest means that due to other activities, relationships or contracts, an Offeror is unable, or potentially unable to render impartial

assistance or advice to the Authority; an Offeror's objectivity in performing the work identified in the Scope of Work is or might be otherwise impaired; or an Offeror has an unfair competitive advantage. Conflict of Interest issues must be fully disclosed in the Offeror's proposal.

All Offerors must disclose in their proposal and immediately throughout the course of the evaluation process if they have hired or retained an advocate to lobby Authority staff or the Board of Directors on their behalf.

Offerors hired to perform services for the Authority are prohibited from concurrently acting as an advocate for another firm who is competing for a contract with the Authority, either as a prime or subcontractor.

M. CODE OF CONDUCT

All Offerors agree to comply with the Authority's Code of Conduct as it relates to Third-Party contracts which is hereby referenced and by this reference is incorporated herein. All Offerors agree to include these requirements in all of its subcontracts.

N. OWNERSHIP OF RECORDS/PUBLIC RECORDS ACT

All proposals and documents submitted in response to this RFP shall become the property of the Authority and a matter of public record pursuant to the California Public Records Act, Government Code sections 6250 et seq. (the "Act"). Offerors should familiarize themselves with the provisions of the Act requiring disclosure of public information. Offerors are discouraged from marking their proposal documents as "confidential" or "proprietary."

If a Proposal does include "confidential" or "proprietary" markings and the Authority receives a request pursuant to the Act, the Authority will endeavor (but cannot guarantee) to notify the Offeror of such a request. In order to protect any information submitted within a Proposal, the Offeror must pursue, at its sole cost and expense, any and all appropriate legal action necessary to maintain the confidentiality of such information. The Authority generally does not consider pricing information, subcontractor lists, or key personnel, including resumes, as being exempt from disclosure under the Act. In no event shall the Authority or any of its officers, directors, employees, agents, representatives, or consultants be liable to a Offeror for the disclosure of any materials or information submitted in response to the RFP or by failing to notify a Offeror of a request seeking its Proposal. The Authority reserves the right to make an independent decision to disclose records and material.

Notwithstanding the above, all information regarding proposal responses will be held as confidential until such time as the evaluation has been completed; an award has been made by the Board of Directors or Authority Staff, as appropriate; and the contract has been fully negotiated.

O. STATEMENT OF ECONOMIC INTERESTS

The awarded Offeror (including designated employees and subconsultants) may be required to file Statements of Economic Interests (Form 700) in accordance with the Political Reform Act (Government Code section 81000 et seq.). This applies to individuals who make, participate in making, or act in a staff capacity for making governmental decisions. The AUTHORITY determines which individuals are required to file a Form 700, and if such determination is made, the individuals must file Form 700s with the AUTHORITY's Clerk of the Board no later than 30 days after the execution of the Agreement, annually thereafter for the duration of the Agreement, and within 30 days of termination of the Agreement.

capability; work load; record of meeting schedules on similar projects; and supportive client references.

Offeror to:

- (1) Provide a brief profile of the firm, including the types of services offered; the year founded; form of the organization (corporation, partnership, sole proprietorship); number, size and location of offices; and number of employees.
- (2) Provide a general description of the firm's financial condition and identify any conditions (e.g., bankruptcy, pending litigation, planned office closures, impending merger) that may impede Offeror's ability to complete the project.
- (3) Describe the firm's experience in performing work of a similar nature to that solicited in this RFP, and highlight the participation in such work by the key personnel proposed for assignment to this project.
- (4) Identify subcontractors by company name, address, contact person, telephone number, email, and project function. Describe Offeror's experience working with each subcontractor.
- (5) Identify all firms hired or retained to provide lobbying or advocating services on behalf of the Offeror by company name, address, contact person, telephone number and email address. This information is required to be provided by the Offeror immediately during the evaluation process, if a lobbyist or advocate is hired or retained.
- (6) Provide as a minimum three (3) references for the projects cited as related experience, and furnish the name, title, address, telephone number, and email address of the person(s) at the client organization who is most knowledgeable about the work performed. Offeror may also supply references from other work not cited in this section as related experience.

b. Proposed Staffing and Project Organization

This section of the proposal should establish the method, which will be used by the Offeror to manage the project as well as identify key personnel assigned.

Offeror to:

- (1) Identify key personnel proposed to perform the work in the specified tasks and include major areas of subcontract work. Include the person's name, current location, proposed position for this project, current assignment, level of commitment to that assignment, availability for this assignment and how long each person has been with the firm.
- (2) Furnish brief resumes (not more than two [2] pages each) for the proposed Project Manager and other key personnel that includes education, experience, and applicable professional credentials.

c. Work Plan

Offeror should provide a narrative, which addresses the Scope of Work, and shows Offeror's understanding of Authority's needs and requirements.

Offeror to:

- (1) Describe the approach to completing the tasks specified in the Scope of Work. The approach to the work plan shall be of such detail to demonstrate the Offeror's ability to accomplish the project objectives and overall schedule.
- (2) Outline sequentially the activities that would be undertaken in completing the tasks and specify who would perform them.

d. Exceptions/Deviations

State any technical and/or contractual exceptions and/or deviations from the requirements of this RFP, including the Authority's technical requirements and contractual terms and conditions set forth in the Scope of Work (Exhibit A) and Proposed Agreement (Exhibit C), using the form entitled "Proposal Exceptions and/or Deviations" included in this RFP. This Proposal Exceptions and/or Deviations form must be included in the original proposal submitted by the Offeror. If no technical or contractual exceptions and/or deviations are submitted as part of the original proposal, Offerors are deemed to have accepted the Authority's technical requirements and contractual terms and conditions set forth in the Scope of Work (Exhibit A) and Proposed Agreement (Exhibit C). Offerors will not be allowed to submit the Proposal Exceptions and/or Deviations form or any technical and/or contractual exceptions after the proposal submittal date identified in the RFP. Exceptions and/or deviations submitted after the proposal submittal date will not be reviewed by Authority.

All exceptions and/or deviations will be reviewed by the Authority and will be assigned a "pass" or "fail" status. Exceptions and deviations that "pass" do not mean that the Authority has accepted the change but that it is a potential negotiable issue. Exceptions and deviations that receive a "fail" status means that the requested change is not something that the Authority would consider a potential negotiable issue. Offerors that receive a "fail" status on their exceptions and/or deviations will be notified by the Authority and will be allowed to retract the exception and/or deviation and continue in the evaluation process. Any exceptions and/or deviation that receive a "fail" status and the Offeror cannot or does not retract the requested change may result in the firm being eliminated from further evaluation.

4. Cost and Price Proposal

As part of the cost and price proposal, the Offeror shall submit proposed pricing to provide the services for each work task described in Exhibit A, Scope of Work.

The Offeror shall complete the "Price Summary Sheet" form included with this RFP (Exhibit B), and furnish any narrative required to explain the prices quoted in the schedules. It is anticipated that the Authority will issue a firm-fixed-price contract specifying firm-fixed-prices for individual tasks.

5. Appendices

Information considered by Offeror to be pertinent to this project and which has not been specifically solicited in any of the aforementioned sections may be placed in a separate appendix section. Offerors are cautioned, however, that this does not constitute an invitation to submit large amounts of extraneous materials. Appendices should be relevant and brief.

B. FORMS

1. Status of Past and Present Contracts Form

Offeror shall complete and sign the form entitled "Status of Past and Present Contracts" provided in this RFP and submit as part of its proposal. Offeror shall identify the status of past and present contracts where the firm has either provided services as a prime vendor or a subcontractor during the past five (5) years in which the contract has been the subject of or may be involved in litigation with the contracting authority. This includes, but is not limited to, claims, settlement agreements, arbitrations, administrative proceedings, and investigations arising out of the contract. Offeror shall have an ongoing obligation to update the Authority with any changes to the identified contracts and any new litigation, claims, settlement agreements, arbitrations, administrative proceedings, or investigations that arise subsequent to the submission of Offeror's proposal.

A separate form must be completed for each identified contract. Each form must be signed by the Offeror confirming that the information provided is true and accurate. Offeror is required to submit one copy of the completed form(s) as part of its proposals and it should be included in only the original proposal.

2. Proposal Exceptions and/or Deviations Form

Offerors shall complete the form entitled "Proposal Exceptions and/or Deviations" provided in this RFP and submit it as part of the original proposal. For each exception and/or deviation, a new form should be used,

identifying the exception and/or deviation and the rationale for requesting the change. Exceptions and/or deviations submitted after the proposal submittal date will not be reviewed nor considered by the Authority.

Reasonableness of the total price as well as the individual tasks; competitiveness with other offers received; adequacy of data in support of figures quoted.

B. EVALUATION PROCEDURE

An evaluation committee will be appointed to review all proposals received for this RFP. The committee is comprised of Authority staff and may include outside personnel. The committee members will evaluate the written proposals using criteria identified in Section III A. A list of top-ranked proposals, firms within a competitive range, will be developed based upon the totals of each committee members' score for each proposal.

During the evaluation period, the Authority may interview some or all of the proposing firms. The Authority has established September 27, 2023, as the date to conduct interviews. All prospective Offerors are asked to keep this date available. No other interview dates will be provided, therefore, if an Offeror is

unable to attend the interview on this date, its proposal may be eliminated from further discussion. The interview may consist of a short presentation by the Offeror after which the evaluation committee will ask questions related to the firm's proposal and qualifications.

At the conclusion of the proposal evaluations, the evaluation committee will score the proposals to develop a competitive range. Offerors remaining within the competitive range may be asked to submit a Best and Final Offer (BAFO). In the BAFO request, the firms may be asked to provide additional information, confirm or clarify issues and submit a final cost/price offer. A deadline for submission will be stipulated.

At the conclusion of the evaluation process, the evaluation committee will recommend, the Offeror with the highest final ranking or a short list of top ranked firms within the competitive range whose proposal(s) is most advantageous to the Authority. The Board Committee will review the evaluation committee's recommendation and forward its recommendation to the Board of Directors for final action.

C. AWARD

The Authority may also negotiate contract terms with the selected Offeror prior to award, and expressly reserves the right to negotiate with several Offerors simultaneously and, thereafter, to award a contract to the Offeror offering the most favorable terms to the Authority.

The Authority reserves the right to award its total requirements to one Offeror or to apportion those requirements among several Offerors as the Authority may deem to be in its best interest. In addition, negotiations may or may not be conducted with Offerors; therefore, the proposal submitted should contain Offeror's most favorable terms and conditions, since the selection and award may be made without discussion with any Offeror.

The selected Offeror will be required to submit to the Authority's Accounting department a current IRS W-9 form prior to commencing work.

D. NOTIFICATION OF AWARD AND DEBRIEFING

Offerors who submit a proposal in response to this RFP shall be notified via CAMM NET of the contract award. Such notification shall be made within three (3) business days of the date the contract is awarded.

Offerors who were not awarded the contract may obtain a debriefing concerning the strengths and weaknesses of their proposal. Unsuccessful Offerors, who wish to be debriefed, must request the debriefing in writing or electronic mail and the Authority must receive it within three (3) business days of notification of the contract award.

EXHIBIT A: SCOPE OF WORK

SCOPE OF WORK

Microsoft Azure VMware Solution Consulting Services

BACKGROUND

The Orange County Transportation Authority (Authority) is a state-mandated transportation agency that brings together all the public entities charged with planning and operating transportation in Orange County, California. The Authority sets transportation priorities, makes countywide spending decisions based on these priorities, plans and funds major highway & freeway projects and street improvements, operates Orange County's public transit systems and provides paratransit services. As one agency, the Authority provides Orange County with a single point of accountability and a greater voice for local residents for all transportation issues.

The Authority's Information Systems (IS) Department is responsible for all computer-related operations at the Authority including applications development, IS planning, User services and technical services.

The Authority's distributed computing future is best built on a modern, integrated network architecture that incorporates best-of-breed, file, print, application, messaging, and Internet/Intranet services.

The IS department supports the computing needs of over 1000 users spread out over five locations in Orange County. IS provides the technical infrastructure that hosts, maintains and supports over ninety (90) business applications of which eleven (11) are considered mission critical. IS also provides professional project management services that ensure proper resources and expectations are met for technology projects, and desktop training services so that its users can optimize their use of desktop computing tools.

As part of the Information Systems Strategic Plan, the department is always looking at the most efficient ways to provide services to our business units. One area that Information Systems has been moving forward with is the use of cloud computing, more specifically the use of Microsoft's cloud services.

OBJECTIVE

The Authority is seeking an Information Technology (IT) Consulting Firm (Consultant) to provide planning and implementation services for the migration of some of the Authority's on-premises test/dev virtual servers to Microsoft Azure VMware Solution. Consultant must be Microsoft Partner certified on Azure and have experience specifically with Azure VMware Solution. Consultant must also have engineers certified on VMWare. Consultant must have completed on-premises virtual server migrations to Azure VMware Solution for

clients of similar size to the Authority along with implementing network connectivity and security via Microsoft Azure ExpressRoute and Azure Firewall.

The goal of this project is to pilot the use of Microsoft Azure VMware Solution along with extending the Authority's on-premise network with Azure ExpressRoute and Azure Firewall in order to better gauge the overall performance and cost of moving our on-premise server workloads to a true Infrastructure as a Service (IaaS) model.

The Authority will assign one of its in-house Project Managers along with making sure that its technical team, which includes both its System Engineers and Network Engineers, will be available for the duration of this project.

The Authority will provide the necessary licenses, subscriptions, and other resources required for the Azure VMware solution. The required services will be added to the Authority's Microsoft Enterprise Agreement.

PRE-MIGRATION ACCOMPLISHMENTS

The Authority engaged the services from Microsoft in December 2022 for an Azure Foundation Assessment. The assessment, utilizing the Movere tool, analyzed the workload of over 300 of the Authority's virtual servers.

Three (3) different options were presented by Microsoft in their final presentation:

1. Azure IaaS Migration
2. Azure VMware Solution Migration
3. Azure Full Modernization Migration

The assessment did not include any analysis associated with extending the Authority's network to Azure via Azure ExpressRoute nor include analysis associated with securing the Azure network via Azure Firewall.

Based upon the assessment, the Authority has decided to move forward with option 2, Azure VMware Solution.

SCOPE OF WORK

The following methodology will be adhered to for Microsoft Azure VMware Solution project:

- **Initiation** – Detail project processes, define roles and responsibilities, and baseline project work plan.
- **Design** – Assess current system state and understand functional and technical requirements according to key business goals and objectives.

- **Implementation** – Configuration of the Azure network, Azure virtual hosts, and the migration of the test/dev virtual servers.
- **Post-Implementation** – Training for the Authority's technical support team, handoff of the Azure VMware Solution to the Authority's technical support team for day-to-day operations, and post migration support.
- **Project Closure** – Facilitate successful completion of the project through formal sign-off of deliverables and "lessons learned".

The Consultant will be required to include a project plan detailing each of the appropriate phases of the project once the contract has been awarded. The Consultant will also be responsible for indicating what resources will be needed and when from the Authority (staff, hardware, software, etc.).

The Consultant will be required to create and maintain all pertinent documentation. All documents must be in Word, Excel, Visio, Project, and PDF format. A master electronic copy will be maintained on-site at the Authority.

Task 1 – Initiation

This is the most critical of all project phases because it provides the vision for how the Consultant's project engagement will fulfill the Authority's goals. In this phase, project processes are focused on defining objectives and constraints; identifying project risks and response strategies; setting expectations; leveraging best practices and establishing mutual consensus on critical project policies and procedures.

Project initiation ensures an integrated and comprehensive project schedule and plan.

Deliverables:

Facilitate a kick-off meeting to achieve the following goals:

- Define roles and responsibilities between Authority and Consultant project team members.
- Define a comprehensive list of constraints that need to be considered in the baseline project schedule.
- Establish task and deliverable priorities.
- Baseline project schedule to measure team progress and critical milestones.
- Establish expectations for deliverable content and level of detail.

This phase takes a partnership approach to the overall project, where Consultant and Authority resources work together to develop a comprehensive project overview. Consultant will facilitate sessions with Authority technical resources to discover all aspects of the project from requirements gathering through pilot and deployment.

The Project Initiation step will achieve the following goals:

- Consultant and Authority will mutually agree upon the scope of each project phase.
- Roles and responsibilities will be negotiated and agreed upon.
- A comprehensive listing of associated tasks will be compiled for each phase.
- Prioritization of tasks and determination as to whether the task is essential for project success or could be deferred if deadlines slip.
- Detailed project plans will be created for each phase of the overall project.
- Consultant and Authority resources will be assigned to previously identified tasks.
- Milestones and deadlines will be established, especially as they relate to critical Authority business constraints.
- Expectations will be set as to deliverables' content and level of detail.

Task 2 – Design

During the design phase of the project, the Consultant's engagement team will work with the Authority's project team in assessing the current on-premises networking and computing infrastructure.

The Consultant will have full access to the Azure Foundation Assessment presentation developed by Microsoft for the Authority.

The Consultant will also review both the geographical components of the Authority to better understand the requirements for the migration to Microsoft Azure. The Consultant will work with the Authority's project team to determine the best approach for implementing all the various phases of the project.

A minimum of ten (10) test/dev virtual servers will be migrated to Azure VMware Solution. Included within those ten virtual servers will be at least one test/dev web server which will require a DMZ to be configured within the Azure network.

A minimum of three (3) Azure VMware hosts/nodes will be required to host the test/dev servers. If dedicated hosts are required for the DMZ then four (4) Azure VMware hosts/nodes will be needed, two within the main network and two in the DMZ.

Even though this is just a pilot with test/dev virtual servers, the network utilizing Azure ExpressRoute and Azure Firewall should be configured to handle all the Authority's virtual server workloads, production and test/dev. Redundancy should also be designed into the network.

Azure data backup, disaster recovery, and server security should also be included within the design.

Deliverables:

- Review of the existing network architecture and identification of the requirements for the new Azure networking services.
- Identification of the existing security policies and controls and evaluation of their suitability for the new environment.
- Identification of the requirements for the Express Route connectivity to the Azure cloud.
- Design of the Azure networking services, including the configuration of virtual networks, subnets, and network security groups.
- Design of the Express Route connectivity to the Azure cloud.
- Definition of the security policies and controls required for the new environment.
- Review of the existing on-premises environment and identification of test/dev server workloads suitable for migration to Azure VMware solution.
- Identification of any required modifications to the existing on-premises environment to ensure compatibility with the Azure VMware solution.
- Design of the Azure VMware solution architecture, including the deployment of VMware virtual machines, storage, and networking.
- Definition of the migration process and validation of the migration plan.
- Development of the backup process for the new Azure VMware solution.
- Development of a disaster recovery plan for the new Azure VMware solution.
- Development of a migration plan that includes timelines, roles, and responsibilities.
- Updated Project Plan – Based upon the results of the design phase, the master project plan will be revised accordingly.

Task 3 - Implementation

The Consultant will work with the Authority's project team to provision the required services from Microsoft via the Authority's Microsoft Enterprise Agreement. The teams will then proceed with the configuration and implementation of extending the Authority's network to Azure, provision the required Azure VMware hosts, and then migrate the test/dev virtual servers. Testing of the network and the applications on the servers will also be completed during the implementation phase.

Deliverables:

- Assist the Authority's project team in provisioning the required services with Microsoft.
- Configuration of the Azure networking services, including virtual networks, subnets, network security groups, and Express Route connectivity.
- Implementation of the security policies and controls required for the new environment.

- Validation of the new environment to ensure that it is functioning correctly.
- Documentation of the new Azure networking environment, including user manuals and standard operating procedures.
- Configuration of the Azure VMware solution and migration of the test/dev server workloads to the new environment.
- Validation of the migrated test/dev virtual server workloads to ensure that they are functioning correctly.
- Validation of the backups for the test/dev virtual servers. This will also include validation of an actual restore of both an entire virtual server and a subset of data on a virtual server.
- Documentation of the new Azure VMware environment, including user manuals and standard operating procedures.

Task 4 – Post-Implementation

The Consultant will be responsible for training the Authority's technical support team on the day-to-day management of the Azure environment and completing the formal handoff. The amount of training will be up to the Consultant based upon experience implementing this type of solution. The Consultant would be required to perform the training. The Authority is open to training being virtual or in-person.

The Consultant will also be required to be on-call to address any issues that may arise during the first four (4) weeks after implementation. The Authority's technical support team will also utilize our Microsoft Unified Support agreement as much as possible for any issues.

Deliverables:

- Training of the Authority's technical team on how to manage and maintain the new environment.
- Handoff of the new Azure networking environment and the new Azure VMware Solution to the Authority's technical team for day-to-day operations.
- Support for any issues encountered during the first four (4) weeks of operation.

Task 5 – Project Closure

In this phase, project processes are focused on measuring and validating that the project vision and goals are realized.

Deliverables:

- **Formal Document Update and Review** – Consultant will deliver all documents in order to update associated project information initiated during each project step that will be accepted, via sign-off, by key Authority project personnel.
- **Lessons Learned** – Consultant will facilitate a session to gather feedback from Authority project personnel and stakeholders concerning the positive and negative events of the project. Using this information, the Authority can review project processes and procedures to insert improvements for subsequent projects.
- **Project Closure Agreement and Acceptance** – Complete a closure and acceptance agreement that demonstrates Authority's final acceptance of the project.
- **Project Binder** – A comprehensive project history that will include an updated project schedule, status reports, change requests, issues log, and a compilation of project deliverables.

LIMITATION ON GOVERNMENTAL DECISIONS
