All Offerors must disclose in their proposal and immediately throughout the course of the evaluation process if they have hired or retained an advocate to lobby Authority staff or the Board of Directors on their behalf.

In order to protect any information submitted within a Proposal, the Offeror must pursue, at its sole cost and expense, any and all appropriate legal action necessary to maintain the confidentiality of such information. EXHIBIT A: SCOPE OF WORK

Scope of Work 2024 Measure M2 Quantitative Survey

BACKGROUND

The Orange County Transportation Authority's (OCTA) projects, programs and services affect every aspect of transportation within Orange County. OCTA is a multi-modal agency involved in decisions that affect the daily quality of life for more than three million people who live in Orange County and countless others who travel here.

As the Orange County's primary transportation agency, OCTA is responsible for providing public transportation via countywide bus service and building the first segment of OC Streetcar, operating the 91 Express Lanes (and soon to open 405 Express Lanes), working with California Department of Transportation to improve freeways, partnering with local jurisdictions to improve streets and roads, administering the Measure M2 (also known as OC Go) Transportation Investment Plan, funding the three (3) Metrolink lines in the county, and coordinating rideshare and vanpool services. In addition, OCTA develops and implements short- and long-term transportation plans.

Measure M2 (also known as OC Go)

In 1990, Orange County voters approved the twenty (20)-year Measure M one-half (1/2) cent sales tax for transportation. Measure M1, which sunsetted in 2011, provided more than \$4 billion in investment in Orange County's transportation infrastructure including improvements to the entire freeway system, upgrading and maintenance of local streets and roads, development of a commuter rail system, and other transit improvements. Since 1990, the significance of the local sales tax program to Orange County has only increased as competition for state and federal transportation funds has grown and availability has tightened.

On November 7, 2006, Orange County voters, by a margin of 69.7 percent (69.7%), approved the renewal of Measure M. With the approval of the Measure M2 Transportation Investment Plan (M2), the voters agreed to continued investment of local tax dollars in Orange County's transportation infrastructure for another thirty (30) years to 2041. M2 contains an investment plan with specific freeway improvements, streets and roads funding programs, transit programs and environmental mitigation.

The M2 Ordinance calls for a Ten (10)-Year Comprehensive Program Review (Review) of all projects and programs implemented under the Plan to evaluate the performance of the overall program and may revise the Plan to improve its performance based on numerous factors. The first Review took place in 2015, nearly ten (10) years following the approval of M2. The next Review is expected to begin in 2024 with a final report expected by 2025.

Every few years, OCTA conducts opinion polls to identify priorities and concerns, gauge public awareness of local and transportation issues, determine interest in potential projects, discover emerging trends and assess awareness of OCTA and Measure M2/OC Go. The last quantitative survey was the 2021 Attitudinal and Awareness public opinion.

By surveying the high propensity voters of Orange County regarding their preferences for short- and long-range transportation priorities, OCTA will be better able to plan for the future. To that end, OCTA is seeking statistically reliable information that can be used to assess support for the current M2 Investment Plan as part of the Review. The results will also assist OCTA with making sound, strategic decisions in a variety of areas including establishing priorities and developing projects and programs by collecting and analyzing current opinion data and comparing the results to prior related surveys where appropriate.

In addition, a high priority for OCTA is public awareness and involvement so an understanding of public perception of OCTA and its ability to implement equitable, more efficient and safer transportation solutions throughout the county is needed as a metric against which to judge future communication and outreach.

At this time, OCTA is seeking consultant services to conduct a quantitative, high propensity voter survey in an effort to ascertain transportation priorities and perceptions.

OBJECTIVES

Consultant shall develop and administer a statistically valid general high propensity voter survey to better understand priorities and public perception of OCTA and its ability to implement safer and more efficient transportation solutions throughout the county. The 2024 Quantitative Survey would gauge public support for a variety of improvements and determine the level of support for the Measure M Investment Plan as well as provide tracking information against the previous surveys. This survey should include questions which address the following:

1. How OCTA is perceived:
 - Awareness of agency
 - Awareness of the various things the agency does and is responsible for
 - How important what the agency does is to the respondents; what influences that priority
 - Perception of how well (or badly) the agency carries out its responsibilities
 - Perception of how effective the agency is
 - How respondents receive information about the agency and what it does.
 - What, and who influences their perceptions of the agency.

2. Examine what changes or improvements respondents would most like the agency to make -- to the transportation system and services.
3. The research should examine participant ideas, attitudes, awareness and perceptions about:
 - OCTA and its programs and services
 - Reductions in transportation revenues as a whole
 - Transportation priorities and strategies
 - Transportation network gaps
 - Issues and concerns with future projects
 - Reactions to changes in state and federal policies including but not limited to priorities to address air quality, managing highways travel demand, congested carpool lanes, and various transportation policies such as role of active transportation, future of public transit and options to manage highway capacity and travel.
 - Expanding capacity of freeways by adding managed lanes and toll facilities with congestion pricing
 - Ensuring transportation improvements are equitable
4. Obtain data to determine the level of public support for the Measure M2 Plan (as part of the Measure M 10-Year Review), by:
 - Assessing awareness of Measure M and OC Go
 - Assessing awareness of specific Plan improvements completed or in progress
 - Gauging support for the projects and programs contained in the Investment Plan
 - Identifying opportunities, issues and concerns
5. Obtain pertinent demographic and socio-economic data
6. Include open-ended questions to allow respondents to make suggestions on what improvements OCTA could make.
7. Identify communication preferences

SCOPE OF WORK

Consultant shall review project objectives, technical information, meet with appropriate staff, design, administer, analyze and report the findings of the survey of Orange County residents. Consultant shall provide information that, at a minimum, in the aggregate, has a margin of error within +/- 3 percent (3%) at the 95 percent (95%) confidence level. This information provided will be reliable for both demographic and geographic subsets.

Consultant shall complete the following tasks:

Task 1: Overall strategy and work plan

- Review the proposed research approach with OCTA
- Agree on a work plan and timetable

Task 1 Deliverable – Project schedule anticipated to include major milestones:

- Survey development: December 2023 – January 2024
- Survey implementation: February 2024
- Final report: March 2024
- Presentations to OCTA Board and public committees: April 2024

Task 2: Develop the survey

- Determine the sampling methodology and sample size of high-propensity voters sufficient to ensure effective demographic and geographic cross-tabulation of results countywide and for at least each of the five supervisorial districts in Orange County, and seven significant demographic questions. The sample size should anticipate several “split sample” questions. The length of the questionnaire should permit the interviews to be conducted in approximately fifteen (15) minutes.
- Upon reviewing applicable materials and previous polls, along with input from OCTA, develop a survey instrument designed to assess attitudes and opinions regarding OCTA’s reputation as an efficient and responsive transportation agency, identify transportation priorities and perceptions, and gauge public support for the Measure M2 Investment Plan as part of the M2 Ten (10)-Year Review.

Task 2 Deliverables –

- Proposed research methodologies, sampling plan
- Draft and final survey instrument

Task 3: Administer the survey

- Conduct a survey of high-propensity Orange County voters in a timeframe sufficient to produce results and a final report by March 15, 2024.
- Within two (2) working days of survey completion deliver aggregate results.

Task 3 Deliverables:
